WiFi Control *

Control your radiator remotely using the IRSAP NOW app available from:

Compatible with the systems:

The WiFi control, on the radiator, connects to smartphones, making product management simple and immediate, configurable by downloading the IRSAP NOW APP available from Android and IOS stores.

This APP allows the management of multiple homes, allowing individual rooms or zones to be configured independently.

The WiFi control is compatible with Google Home, Amazon Alexa and IFTTT protocol.

As well as monitoring and setting the desired temperature, the WiFi control has the following functions:

stand-by function, key lock function, antifreeze function, HOME/AWAY function (geolocation), holiday function, detect open window function, ITCS function (Intelligence Temperature Control System), which allows you to have the exact temperature at the set time, VOC function i.e. air quality control.

*** Available only for UE and CH.**
